### Agenda 12/17:

- Review action items from last meeting.
- Management updates ([Amy Benson](#) and [Stan Barone](#))
  - Training plan
  - Communications plan
- DIDP/DINP Question [Jennifer Brennan](#) and [Hillary Hollinger](#):
  1. Why is the 'Literature Search September 2019' tag number changing for both DIDP and DINP (example, DINP was 975 ref, now 925; DIDP was 504 ref, now 486 ref)?
    1. Is this a result of deduplication or exclusion? We think deduplication of quarantined references, but need confirmation.
  2. What happens to references that have been tagged to one chemical in SR and are later identified to be relevant to another chemical?
    1. Project specific question: What has happened with references that were initially tagged to another chemical in SR, but are now tagged to DINP/DIDP as part of the manufacturer reference list? Are we assuming results from the other chemical's SR automatically apply to DINP/DIDP, or are these reference going through SR (again) for DINP/DIDP-specific results? Screening was

combined for Phthalates as they were published together in one assessment, but this won't be the case for these chemicals moving forward.

2. Who is responsible for ensuring these IDs make it to SR?

- Comparing phthalates references in Environment Canada cumulative risk assessment with our lit search ([Ryan Sullivan, Jennifer Nichols](#))
- Update on D4. What is timeline? Feb 1 is new deadline. ([Ross Geredien](#))
- Other items
- Recap on action items from this meeting.

Separate conversation: We know we need to reorganize the HERO tag tree structure, and I do not remember if anyone specific is working on it yet, but I have ideas. The current tag model reflects items sent to screening and final decisions, but not the justifications of those decisions. If we model the new structure to reflect screening choices as the primary criteria, we save ourselves a lot of time, spreadsheet comparison, and transparency questions. I'm working on a template that I can forward later, but let me know if I'm duplicating effort!

Weekly meeting for the systematic review tech team, including members from ECRAD and DGAD. Agendas will be provided in advance of the weekly meeting. Please send agenda items to Jen and Sidrah by Wednesday 3pm before the meeting.
